
A 独立表项
u 处目标为 1
$\hat{V}(u) : 0 \to 0.1$
$\hat{V}(v) : 0 \to 0$
只改被观测的表项
步长均为 0.1
B 共享参数
u 处误差更新 θ_1
$\boldsymbol{\theta} : (0,0)^{\mathsf{T}} \to (0.1,0)^{\mathsf{T}}$
$\hat{V}(u) = \theta_1 : 0 \to 0.1$
$\hat{V}(v) = \theta_1 + \theta_2 : 0 \to 0.1$
