有界读取 L_i
$L_i f = \langle f, h_i \rangle$
保留分量 f_M
$M = \mathrm{span}\{h_i\}$
$L_i(f_\perp) = 0$
有限系数 $\mathbf{a}$
$f_M = \sum_j a_j h_j$
读取值 $\mathbf{Ga}$
范数平方 $\mathbf{a}^\top \mathbf{Ga}$
有限目标的求解
$\inf_{\mathbf{a} \in \mathbb{R}^n} \left\{ \Phi(\mathbf{Ga}) + \Omega\left(\sqrt{\mathbf{a}^\top \mathbf{Ga}}\right) \right\}$
