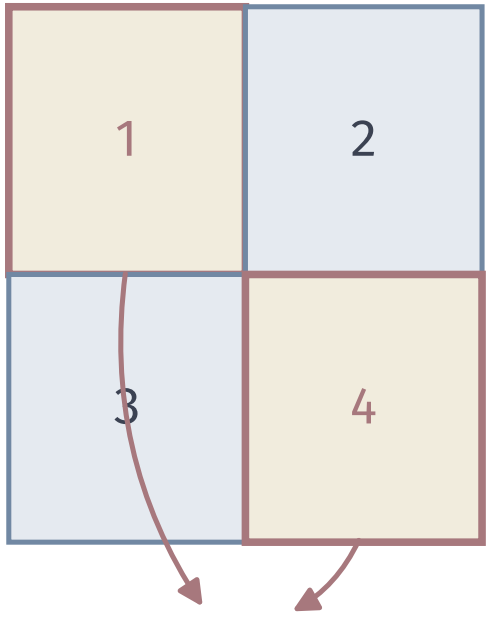
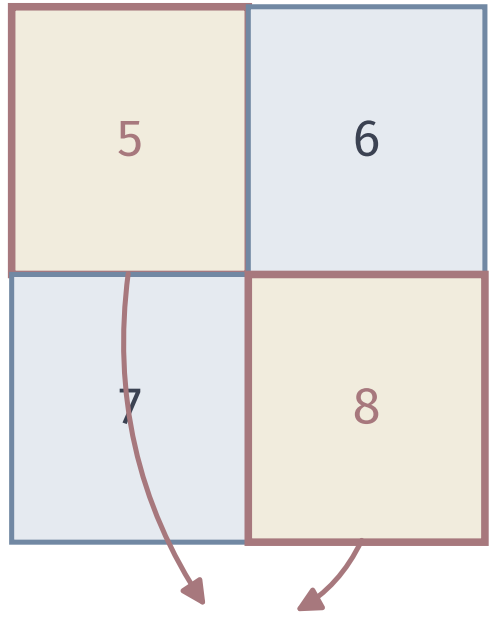
缩约：沿槽位 (i, j) 把 T[i, i, k] 配对求和，消去两个槽位

k = 0 切片



$C_0 = T[0, 0, 0] + T[1, 1, 0] = 5$

k = 1 切片



$C_1 = T[0, 0, 1] + T[1, 1, 1] = 13$

黄色格为被缩约的对角槽位；其余槽位保留为 k，结果是向量 C = (5, 13)
