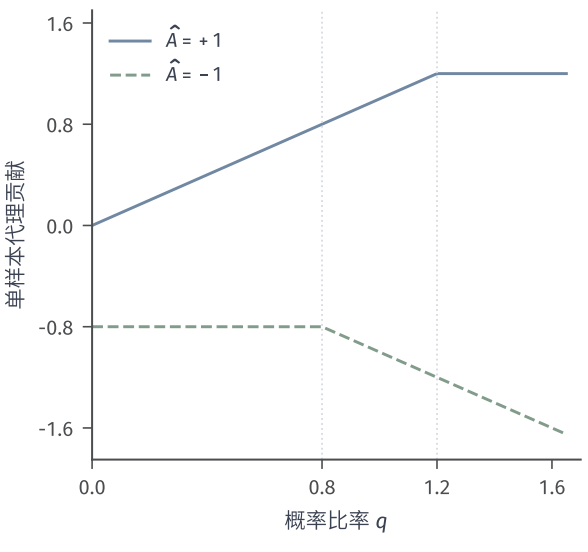
(a) 坐标步长与行为变化

$p = 0.5$
$\theta = 0,\ \phi = 10\theta = 0$

$\Delta\theta = 0.1$
$p = \sigma(0.1) \approx 0.5250$

$\Delta\phi = 0.1$
$p = \sigma(0.01) \approx 0.5025$


Fisher 度量比较分布变化
不把不同坐标的同一步长等同
